### Three installation methods, without dead angle

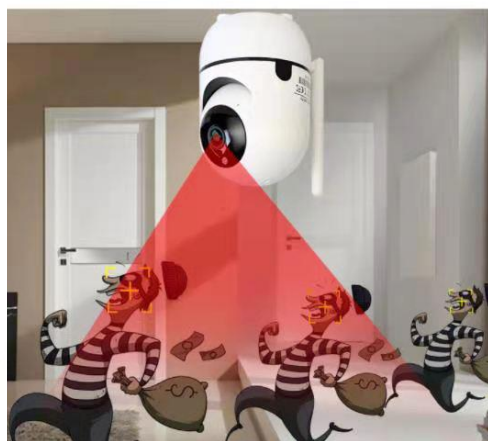

### Motion detection alarm

When there is no one at home, turn on the detection function. When someone is identified to enter the monitoring environment, the app will timely report a warning and remind, and shoot and record the picture in time

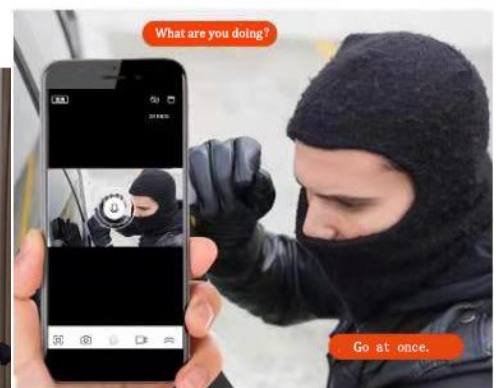

### Mobile tracking - Intelligent tracking

When the moving object enters the range of the camera, the camera will capture the motion trajectory of the moving object and track the shooting until the object disappears within the range of the camera.

### Two-way voice intercom

Remote view at any time

### AP hotspot

You can see it without a network

# [SMART]:LIVING Camera Video Doorbell

Video Camera Doorbell Home Security Wi-Fi Smart living  
Smartphone APP: Remote Video – Rainproof 2 Way Voice.

This Video Door Bell does three essential things for you.

- ⊕ **1080p HD video capture for clear footage.**
- ⊕ **Motion alerts even if a visitor doesn't ring the doorbell.**
- ⊕ **Two-way audio and video communication for interaction with visitors.**

## Key Features:

- Easy Installation, Easy Maintenance, No Wiring Needed.
- HD Video Quality, Answer Your Door & Watch at Any Time and From Anywhere.
- Long Lasting Battery Life, 8-12 Months Use on a Single Charge.
- Compatible with IOS and Android Smart Phones.
- Movement detecting, Intrusion alarm zone.
- Night vision and built-in IRCUT technology, available day and night.
- Rainproof: Doorbell can be installed outdoors
- Picture snapping and video recording function all in Real Time.
- It is ideal for monitoring visitors to your home, especially if you are away for a number of hours each day. The built-in sensor will alert you to parcel deliveries and even unwanted intruders.

## The Smart Living Video DoorBell

It is likely that the first thing you will notice is the modern style is enhanced by the simple button and small camera lens, which are designed to go unnoticed by visitors which interact with the doorbell.

The durable doorbell measures 12.65cm x 6.17cm x 2.21cm so can be easily located on a wall or thick doorframe. It is ideal for monitoring visitors to your home, especially if you are away for a number of hours each day. The built-in sensor will alert you to parcel deliveries and even unwanted intruders.

## Answer your front door from anywhere with the Smart Living App

This Video DoorBell provides you with instant alerts to your tablet, smartphone or PC. If the doorbell is pressed or the motion sensor is triggered, with the app and enables you to see and speak to your visitors, even if you are away from home. If a visitor presses the button or triggers the motion sensor, the app will send a notification to your phone or smart device. This will start a video call, which allows you to have a two-way conversation with the visitor.
